ABOUT ME

Faculty of Computer Science student majoring in Information Systems with experience in leadership, project management, and organizational development. Served as Co-Founder of UVICS and Chairman of an international competition, leading cross-functional teams, coordinating large-scale programs, and managing organizational operations. Passionate about continuous learning, problem-solving, and creating impactful solutions through collaboration, adaptability, and strong analytical thinking.

EDUCATION

Bachelor's Degree in Information Systems

2023 – Present

Universitas Klabat

- Current GPA: 3.83/4.00 (119 completed credits)
- Co-Founder of UVICS, a technology and academic-focused student organization
- Chairman of PROXOCORIS International Competition in collaboration with CORIS
- Elected Parliamentary Coordinator of the Student Council for the 2026 term
- Multimedia Division Coordinator at Pioneer Chapel, Universitas Klabat
- Frequently selected as Project Coordinator for competition teams and Event Leader for university and international programs organized by Universitas Klabat.

Senior High School

2019 - 2022

SMA Kristen Eben Haezar Manado

- Graduated with an average academic score of 89.95
- Active member of the Photography Extracurricular Club, involved in event documentation and outdoor photography activities focused on creativity and visual storytelling

CORE SKILLS

- Leadership & Organizational Management
- Project Management & Team Coordination
- Problem Solving & Analytical Thinking
- Full-Stack Web Development
- Financial Planning
- Communication & Cross-Functional Collaboration

LEADERSHIP EXPERIENCE

Co-Founder & Treasurer

UNKLAB Virtue in Computer Science (UVICS)

April 2024 – May 2026

- Co-founded and established a technology and academic-focused student organization aimed at empowering students in science, technology, and competition development
- Managed organizational budgeting, cash flow, and financial reporting to ensure accountability and operational sustainability
- Collaborated with the Finance and Administration Division (Vice Rector II Office) of Universitas Klabat regarding budgeting and financial support for competition teams and academic programs
- Coordinated with all divisions regarding financial planning, budget allocation, and operational funding usage
- Managed Internal Development Division programs, including semester activity planning, member development initiatives, collaborative learning sessions with university lecturers, and professional sharing sessions with external speakers
- Coordinated workshops, mentoring sessions, and academic development programs with faculty members and external mentors
- Designed and implemented programs integrating leadership, public speaking, creative media, and project management skills

Chairman — PROXOCORIS International Competition 2026

Universitas Klabat × CORIS (Corporation Research Inter University)

October 2025 - May 2026

- Led the overall planning, coordination, and execution of an international technology competition involving multiple divisions and external partners
- Coordinated cross-functional committees to ensure efficient event operations, timeline management, and program execution
- Collaborated with advisors, faculty members, sponsors, and external stakeholders throughout the event lifecycle
- Oversaw strategic planning, delegation of responsibilities, and operational decision-making for the competition
- Ensured effective communication and coordination between organizing committees, participants, and partnering institutions
- Managed the execution of competition programs, meetings, and large-scale event activities in a professional and organized manner

Parliamentary Coordinator — Student Council

Faculty of Computer Science, Universitas Klabat

January 2026 - November 2026

- Coordinated the implementation of weekly faculty academic programs and public lecture sessions conducted every Thursday
- Collaborated with the Dean, Head of Study Programs, and faculty lecturers in organizing and managing academic activities within the Faculty of Computer Science
- Worked closely with other Student Council divisions to ensure the successful execution of faculty-wide programs and events
- Supported communication and operational coordination between student representatives and faculty management

ORGANIZATION EXPERIENCE

Multimedia Division Coordinator — Pioneer Chapel

Universitas Klabat

August 2025 – January 2026

- Led the Multimedia Division in managing visual media, documentation, and publication activities for campus chapel programs and events
- Coordinated multimedia teams to support weekly services.
- Managed digital content production, event documentation, and media publication to enhance communication and audience engagement
- Collaborated with organizing committees and other divisions to ensure smooth technical and multimedia operations during events
- Oversaw task delegation, workflow coordination, and team preparation for multimedia-related activities

Steering Internal Development Division

UNKLAB Virtue in Computer Science (UVICS)

August 2025 – February 2026

- Served as a Steering Committee member responsible for supervising and supporting Internal Development Division programs and member development initiatives
- Contributed to the planning and evaluation of organizational programs focused on leadership growth, academic improvement, and competition preparation
- Assisted in developing structured mentoring activities, collaborative learning sessions, and internal training programs for UVICS members
- Collaborated with officers and division coordinators to ensure the effectiveness and sustainability of internal organizational development programs
- Provided strategic guidance and operational support for division activities, program implementation, and member engagement initiatives

Steering Publication & Documentation Division

UNKLAB Virtue in Computer Science (UVICS)

September 2024 – April 2025

- Served as a Steering Committee member overseeing publication, documentation, and media-related activities within the organization
- Supported the development of digital publication strategies, event documentation workflows, and organizational branding initiatives
- Coordinated with division members regarding content planning, publication schedules, and media coverage for organizational programs and events
- Assisted in maintaining the quality and consistency of organizational publications, visual content, and event documentation

Publication, Documentation & Multimedia Division Member

GPdI Youth Ministry Region LX

October 2022 – August 2023

- Contributed to publication, documentation, and multimedia activities for regional youth ministry programs and events
- Assisted in managing event documentation, visual media production, and digital publication materials
- Collaborated with committee members and ministry teams to support communication and multimedia operations during events
- Supported the creation and distribution of promotional and informational content for youth activities and regional programs
- Participated in coordinating multimedia workflows and event media coverage to ensure organized and effective program execution

COMMITTEE EXPERIENCE

Treasurer — PROXOCORIS International Competition 2025

Universitas Klabat × CORIS (Corporation Research Inter University)

January 2025 – May 2025

- Managed the overall financial operations of an international technology competition from planning to event execution
- Handled budgeting, cash flow management, expense tracking, and financial reporting to ensure transparency and accountability throughout the event lifecycle
- Coordinated with organizing committees and division leaders regarding budget allocation, operational funding, and financial planning
- Successfully secured sponsorships and partnership support from organizations including Dicoding and AD Produksi
- Collaborated with sponsors and external partners to support fundraising and financial sustainability for the competition
- Assisted in managing sponsorship coordination and partnership communication with supporting organizations and industry partners
- Ensured efficient financial operations and supported the successful execution of large-scale international competition programs and activities

Steering Committee — Documentation Division

PPIT Menyapa: Community Service Program for Children with Disabilities, Panti ABK Dimembe *October 2022*

- Served as a Steering Committee member in the Documentation Division for a social outreach and community service program focused on supporting children with disabilities
- Coordinated event documentation throughout the program
- Collaborated with organizing committees to ensure proper documentation and effective communication of community service activities
- Supported the successful execution of social service activities through teamwork, coordination, and operational assistance

Speaker, Mentor & Treasurer — UVICS Programs and Workshops

UNKLAB Virtue in Computer Science (UVICS)

June 2025 – July 2025

- Served as a speaker and mentor in mentoring sessions focused on Effective Communication & Professional Written Communication for competition and academic development programs
- Delivered guidance on communication strategies, teamwork, presentation skills, and professional interaction practices in competitive environments
- Assisted members in strengthening problem-solving abilities, communication confidence, and competition readiness through mentoring activities
- Served as Treasurer for the UVICS × SMP UALS Workshop titled Fundamentals of Computational Thinking and Programming with Scratch
- Managed workshop budgeting, financial allocation, expense tracking, and financial reporting to support smooth program execution
- Coordinated financial operations and operational support to ensure the successful implementation of educational and technology-focused workshop activities

Master of Ceremony (MC) — Student Orientation Program

Faculty of Computer Science, Universitas Klabat

August 2025

- Served as Master of Ceremony (MC) for the Faculty of Computer Science Student Orientation Program (PKKMB) at Universitas Klabat
- Facilitated event flow, audience engagement, and communication during faculty orientation and introduction sessions
- Coordinated with organizing committees and faculty representatives to ensure smooth and professional event execution
- Demonstrated strong public speaking, communication, and stage management skills in front of new students and faculty participants

COMPETITION EXPERIENCE

Business Case Competition — 1st Place Winner

PROXOCORIS International Competition 2026

March 2026 – April 2026

- 1st Place Winner of the PROXOCORIS International Business Case Competition 2026
- Developed CircularLink, an AI and blockchain-integrated digital marketplace solution for sustainable waste management and circular economy systems
- Conducted strategic business analysis using frameworks such as PESTEL, market analysis, and financial feasibility modeling
- Designed scalable business and operational strategies focused on recycling efficiency, supply chain transparency, and sustainability solutions

Business Case Competition — Top 10 Finalist

Ambitions Competition 2025

November 2025 – December 2025

- Selected as a Top 10 Finalist in a business case competition through the development of DIGIMICRO, a digital microfinance transformation strategy focused on financial inclusion and business competitiveness
- Developed innovative digital finance solutions integrating AI, blockchain, and digital lending concepts to support microfinance modernization
- Conducted strategic analysis using frameworks including PESTLE, SWOT, IFE-EFE, and Gap Analysis to identify digital transformation opportunities and challenges
- Designed scalable digital business and implementation strategies aimed at improving financial accessibility, operational efficiency, and sustainable economic growth

Hackathon Competition — Participant

Infinite Hackathon by OJK

October 2025

- Developed LokaGames, a Web3-based game marketplace platform designed to support Indonesian game developers through transparent digital distribution and blockchain integration
- Designed hybrid payment and NFT-based ownership systems integrating Web2 and Web3 technologies, including smart contracts, blockchain wallets, and digital asset licensing
- Built business and technical concepts using technologies such as React.js, Next.js, Node.js, MongoDB, Solidity, and Ethereum Sepolia Testnet
- Contributed to marketplace system design, blockchain transaction workflows, and community-driven digital ecosystem strategies for the gaming industry

OUTCOME-BASED PROJECT CLASSES

UKHUB — Student Organization Information Portal

Frontend Developer | Full-Stack Web Application

October 2025 – November 2025

- Developed the frontend interface of UKHUB, an integrated web platform for managing student organization information, activities, rooms, and announcements in a centralized and real-time system
- Built responsive and role-based user interfaces for Admin, Lecturer Advisors, and Students using React 19, Vite, TailwindCSS, and React Router DOM
- Implemented multi-role authentication systems, dashboard navigation, CRUD functionalities, and global search features to improve information accessibility and operational efficiency
- Designed mobile-first responsive layouts with dark/light mode support and localStorage persistence to enhance user experience across devices
- Collaborated in full-stack development workflows involving frontend integration, system testing, and application optimization

BraveVerse Beauty — AI-Powered Skincare E-Commerce Platform

Full-Stack Developer | Full-Stack Web Application

October 2025 – November 2025

- Developed BraveVerse Beauty, a skincare e-commerce platform focused on Korean beauty.
- Built and integrated secure payment gateway systems using Midtrans API with support for multiple digital payment methods
- Implemented AI-powered customer support features using Google Gemini API to improve customer interaction and shopping assistance
- Developed shopping cart systems, real-time quantity management, product filtering, and checkout workflows to enhance user experience and transaction efficiency
- Managed backend development, API integration, VPS deployment, and Nginx server configuration to ensure application stability and production readiness
- Utilized technologies including Node.js, Express.js, Vanilla JavaScript, Midtrans API, Google Gemini API, VPS, and Nginx for full-stack application development

Klinik Sentosa — Web-Based Clinic Management System

Full-Stack Developer | Full-Stack Web Application

October 2025 – November 2025

- Developed Klinik Sentosa, a comprehensive clinic management system designed to automate healthcare operational workflows and improve service efficiency
- Built multi-role authentication and authorization systems for Admin, Doctors, Pharmacists, and Clinic Management using secure role-based access control
- Implemented real-time queue management, digital medical records, diagnosis workflows, and integrated prescription management systems
- Developed pharmacy inventory, payment, billing, and automated calculation systems to support accurate operational and financial processes
- Designed reporting and executive analytics dashboards with data visualization features to support strategic decision-making and operational monitoring
- Utilized technologies including FastAPI, SQLAlchemy, SQLite, React 19, Vite, TailwindCSS, Zustand, and Recharts for scalable full-stack system development

ZeroBite — AI-Powered Food Redistribution Platform

Full-Stack Mobile App Developer | Mobile Application Project

March 2026 – May 2026

- Developed ZeroBite, an AI-powered food redistribution platform designed to reduce food waste and improve food accessibility through location-based surplus food distribution
- Built mobile-first application workflows including food discovery, ordering, QR-based claim verification, transaction history, and provider location tracking
- Integrated AI chatbot and personalized recommendation systems to provide real-time food suggestions, claim assistance, and user support based on preferences and location
- Designed end-to-end provider and user workflows to streamline food redistribution processes and reduce manual operational handling
- Implemented real-time location-based features and interactive user experiences using React Native, Expo, Convex, and cloud-based storage systems
- Contributed to scalable application architecture combining mobile technologies, AI integration, and real-time backend services for social impact solutions

UI/UX Research & Redesign Project — Daily Mail Website

UI/UX Researcher & Designer | Human-Computer Interaction Project

April 2026 – May 2026

- Conducted UI/UX evaluation and redesign research for the Daily Mail website using Design Thinking, Heuristic Evaluation, and System Usability Scale (SUS) methodologies
- Identified key usability issues including visual overload, inconsistent navigation, poor content hierarchy, and low user satisfaction through mixed-method user research and usability testing
- Designed redesigned UI/UX prototypes focused on minimalist layouts, improved navigation structures, enhanced readability, and better visual consistency using user-centered design principles
- Conducted prototype usability testing using Maze platform to analyze user interaction efficiency, navigation behavior, and engagement metrics across multiple interface pages
- Collaborated in research documentation, usability analysis, prototyping, and presentation development for Human-Computer Interaction academic research projects

IT Project Management

Project Manager & System Analyst

January 2026 – May 2026

- Applied Scrumban methodology (Scrum + Kanban) including sprint planning, daily stand-ups, sprint reviews, and retrospectives throughout a 3-month project timeline
- Served as rotating Project Manager during a 2-week sprint, leading a team of 6 members in delivering wireframes, proposal documentation, and product requirement specifications
- Developed Product Requirements Documents (PRD) for a Lost & Found System and an Organization Information Management System with functional specifications, SMART acceptance criteria, and user workflow analysis
- Coordinated team collaboration, sprint execution, and task management to ensure effective project delivery and workflow organization
- Contributed to system planning, requirement analysis, and agile project management processes in a collaborative software development environment

Information System Audit — Kopi Kenangan POS Security Analysis

System Analyst & IT Auditor

January 2026 – May 2026

- Conducted an information system security audit on the Point of Sale (POS) system at Kopi Kenangan based on ISO/IEC 27001:2022 standards
- Performed risk assessment, gap analysis, and Root Cause Analysis (RCA) focusing on confidentiality, integrity, and availability aspects of the POS system
- Identified critical operational risks including internet dependency, limited access control, lack of manual backup procedures, and centralized system vulnerabilities
- Developed security and operational recommendations including multi-user access control, backup network infrastructure, SOP troubleshooting procedures, and periodic security awareness training
- Collaborated in audit documentation, qualitative analysis, risk evaluation, and presentation development for Information System Audit coursework and business case evaluation projects
